## SC750<sup>™</sup> & SC800<sup>™</sup>

Walk-Behind Scrubbers

### Simple operation, flexible performance.

Advance's rugged, low-maintenance SC750™ and SC800™ scrubbers deliver incredible value on a walk-behind platform. High productivity per tankful allows for 84 minutes of continuous scrubbing, which reduces dump/refill cycles and helps provide fast ROI. The SC800 model is available with EcoFlex™ System which offers the flexibility to clean across the entire cleaning spectrum from green to clean. At the touch of a button one can switch from chemical free cleaning to using an ultra low dilution ratio, and of course detergent can be used at full strength for the toughest of soils. The burst of power feature lets you easily apply more pressure, more solution and more detergent at the touch of a single button. With the flexibility to easily apply the right scrubbing performance for the job, you'll use less detergent, minimize water use and save on cleaning costs.

One-Touch™, integrated scrub pressure and solution flow rate settings:

Regular Scrub For use on moderate soil levels on most floor surfaces (90% of scrubbing applications)

Extreme Scrub
For use on extreme soil levels
(10% of scrubbing applications)

A built-in squeegee hanger makes transport easier and reduces trip and fall accidents.

An integrated debris catch cage traps and collects drain clogging debris.

- High capacity solution/ recovery tanks SC750 21 gal (80 L) SC800 25 gal (95 L) offer high productivity through fewer dump/ refill cycles
- Very-quiet 61 dB A sound level allows for daytime cleaning
- Soft-Touch™ paddle system provides superior comfort and safety
- A choice of an onboard charger or shelf charger provides convenient charging options\*
- Gray, non-marking solid tires provide superior traction
- Heavy-duty steel deck and dual rollers protect the machine and facility

\* Onboard charger available on SC800 models only.

**Entryway Cleaning Routine Scrubbing** 

**Grease Removal** 

**Ultra-light to Heavy Scrubbing** 

Grout and Porous-surface Cleaning **Spill Cleanup** 

**Detergent Residue Removal (Using Water Only)** 

#### Green

EcoFlex elevates green cleaning to a new standard – one that promotes good health and hygiene in addition to environmental sustainability. Efficient operation reduces all of the environmental impacts in cleaning—from the obvious (water, detergent) to the not-so-obvious (machine run-time and energy use).

#### Clean

Maintaining a clean, healthy indoor environment for you and the people in your building is hassle-free with EcoFlex. Detergent use, pad pressure and flow rate are right at your fingertips. Operators won't have to hesitate to make adjustments for higher sanitary standards, different surface types or unexpected cleaning challenges.

# Maintain a flexible routine WATER ONLY

#### Cost-efficient

Flexibility means doing more with one machine. You'll save time, use fewer machines, and reduce water and detergent costs. Today's increasing demands for cost efficiency are tough to meet. Now you can do more with less.
